1. Introduction	4
2. Login via PuTTY SSH	5

1. Introduction

This document is shown how to login UBDA Platform using PuTTY

*Note: User should first register a user account through UBDA website at:
<https://www.polyu.edu.hk/pfs/index.php/177729> to access the UBDA Platform*

2. Login via PuTTY SSH

PuTTY is a free SSH and Telnet Client, most commonly used on Windows.

2.1 Download installation package

<https://www.chiark.greenend.org.uk/~sgtatham/putty/latest.html>

Download PuTTY: latest release (0.75)

[Home](#) | [FAQ](#) | [Feedback](#) | [Licence](#) | [Updates](#) | [Mirrors](#) | [Keys](#) | [Links](#) | [Team](#)
Download: [Stable](#) | [Snapshot](#) | [Docs](#) | [Changes](#) | [Wishlist](#)

This page contains download links for the latest released version of PuTTY. Currently this is 0.75, released on 2021-05-08.

When new releases come out, this page will update to contain the latest, so this is a good page to bookmark or link to. Alternatively, here is a [permanent link to the 0.75 release](#).

Release versions of PuTTY are versions we think are reasonably likely to work well. However, they are often not the most up-to-date version of the code available. If you have a problem with this release, then it might be worth trying out the [development snapshots](#), to see if the problem has already been fixed in those versions.

Package files

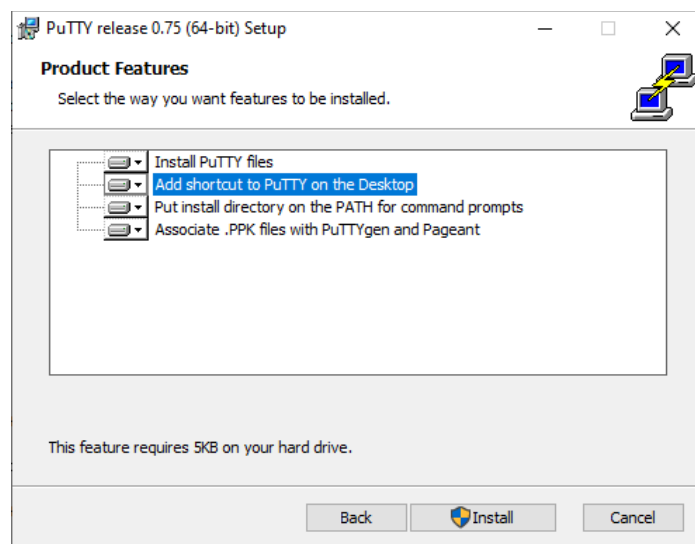

You probably want one of these. They include versions of all the PuTTY utilities.

(Not sure whether you want the 32-bit or the 64-bit version? Read the [FAQ entry](#).)

MSI ('Windows Installer')		
64-bit x86:	putty-64bit-0.75-installer.msi	(or by FTP) (signature)
64-bit Arm:	putty-arm64-0.75-installer.msi	(or by FTP) (signature)
32-bit x86:	putty-0.75-installer.msi	(or by FTP) (signature)
Unix source archive		
.tar.gz:	putty-0.75.tar.gz	(or by FTP) (signature)

2.2 Starting the Installer

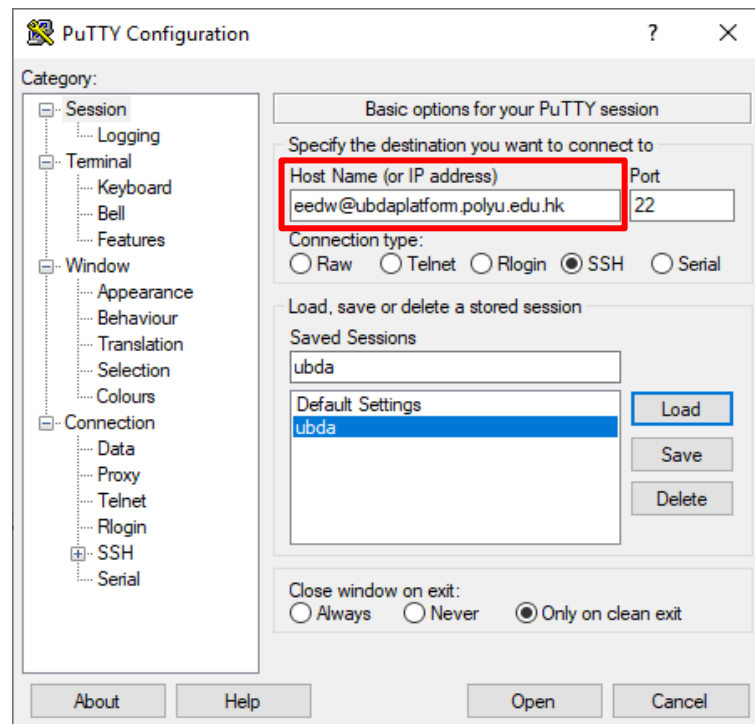

2.3 Configuring and Installing

2.4 Running PuTTY

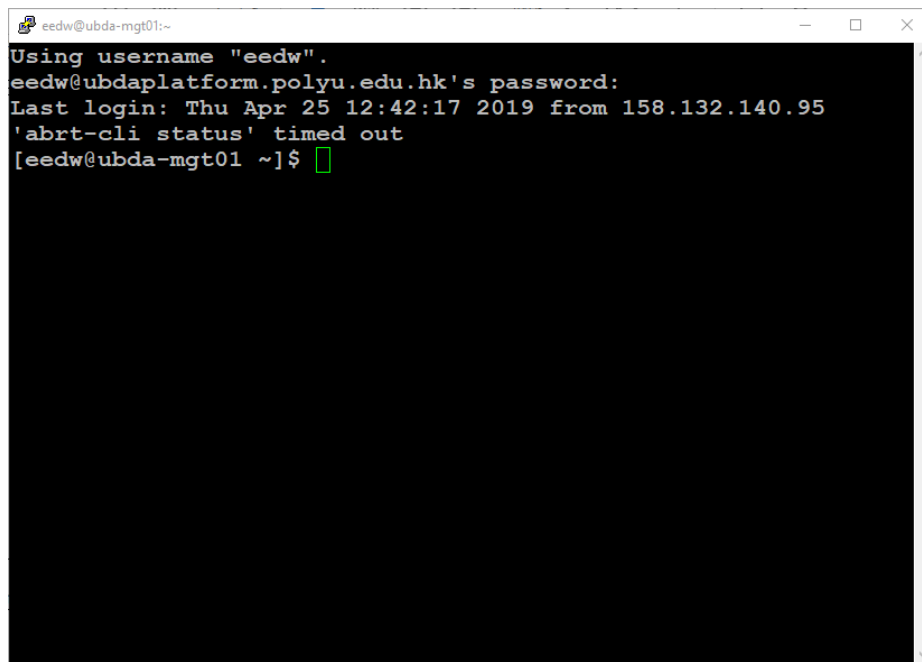

When the software starts, user should get a window with the title “PuTTY Configuration” with a field **Host Name** in the upper middle part.

- Enter a Host Name: NetID@ubdaplatform.polyu.edu.hk
- Connect Type: SSH
- Saved Sessions: ubda

Click “**Open**” Box after completed setting

2.5 Enter your net password to login

A terminal window titled 'eedw@ubda-mgt01:~' showing the SSH login process. The output is as follows:

```
Using username "eedw".
eedw@ubdaplatform.polyu.edu.hk's password:
Last login: Thu Apr 25 12:42:17 2019 from 158.132.140.95
'abrt-cli status' timed out
[eedw@ubda-mgt01 ~]$
```

Note:

SSH security tries to stop people from knowing how long your password by not showing your typed password in the terminal prompt. You can continue to type in your Net password normally and press enter. Then, you should get in.
